--DETAILED ACTION

1. This application has been examined. Claims 1-23 are pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

5. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watkins, Jr. in view of Patterson et al. The claims are readable on the patent to Watkins, Jr. with the

exception of the recitation of the cylindrical tank being double-walled as taught by Figure 2 of Patterson et al. Note in particular the pump 80 and coaxing filter elements shown in Figures 3 and 4 and discussed in column 4, lines 44+. Disposition of the respective elements relative to the chassis is clearly shown. The particular material of construction of the tank 11 is deemed design choice. It would have been obvious to one of ordinary skill in the art to modify the tank of Watkins, Jr, to be double-walled in order to more safely transport the fuel. With regard to method claims 20-23, it would have been obvious to one of ordinary skill in the art to operate the modified tank truck of Watkins, Jr. as above by the recited method steps.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
